

## LEVEL 3<sup>®</sup> ADAPTIVE NETWORK SECURITY

Today's network-enabled organizations rely on the internet for mission-critical connections to employees, partners and customers. A more mobile workforce and bring-your-own-device (BYOD) policies are expanding the security perimeter – introducing heightened levels of risk. With so many enterprises migrating to hybrid wide area network (WAN) architectures, their data, applications and systems are more exposed than ever.

Typically, organizations deploy a complicated patchwork of firewalls and security solutions to protect their infrastructure, creating vulnerabilities and blind spots that are exacerbated by a lack of security personnel. As the traditional corporate perimeter expands, one thing is clear: To proactively defend against attacks, what's needed now is a flexible, multi-layered, network-based security posture.

### Business Solutions

Level 3 Adaptive Network Security is a network-based layer of protection against an increasingly complicated threat landscape. The Level 3 network acts as a sensor, giving you the visibility and control needed to monitor, block and report attempts to break into your network. Delivered as a combination of service chained functions in the cloud, Level 3 Adaptive Network Security can quickly adapt to new threats without requiring huge customer investments and new expertise. By moving protection physically closer to the origins of threats, we're able to neutralize threats more efficiently and effectively. Adaptive Network Security is carrier agnostic, allowing customers to protect internet connections with Level 3, hybrid environments, and third-party networks.

Security spending is ballooning and organizations are looking for ways to improve protection and control costs.

**“During the past two years, security spending as a percentage of the total IT budget remained strong at about 21% across most industry sectors.”\***

### Level 3 Adaptive Network Security

Built on the proven foundation of network-based security, Level 3 Adaptive Network Security delivers cost-effective, flexible and reliable protection wherever business happens — without sacrificing performance.

## Level 3 Adaptive Network Security

combines a wide range of next-generation security technologies that help organizations stay ahead of threats.

- Cloud-based, hybrid model available with support of premises
- Technology service chaining in Level 3 gateways
- Fully managed and maintained

### Features:

- Intrusion Detection Service
- Intrusion Protection Service
- Web content/URL filtering
- Application awareness and control
- Anti-malware (sandboxing)
- Data loss protection (DLP)
- Logging and reporting in the MyLevel3<sup>SM</sup> customer portal
- 24/7 Security Operations Center support
- Backed by threat intelligence
- Carrier ISP agnostic

## Flexible Feature Packaging

Adaptive Network Security is available in basic and premium feature packages. Packages can then be customized to enable the purchase of optional service options.

## Adaptive Network Security Package Pricing Model

Pricing is based on tiered bandwidth ranges that correspond to the committed information rate (CIR) of the internet service.

Log management pricing is sized by storage and retention duration.

## Why Choose Level 3 Adaptive Network Security?

### Broad Global Coverage

- Customer proximity improves latency

### Ease of Deployment

- Efficiently layer new technologies in a network-based environment in the cloud

### Flexible Connectivity Options

- Supports GRE, IPsec, IP VPN
- Hybrid on-premises (CPE) and cloud-based deployments available
- VLAN segmentation shields data

### Breadth of Next-Generation Technology Options

- Comprehensive suite of optional services
- Based on next-generation firewall technology

### Comprehensive Visibility and Control

- Centralized policy management with visibility through a consolidated portal
- Support of Level 3<sup>SM</sup> Threat Research Labs and global Security Operations Centers

### Increase Efficiencies

- Carrier-agnostic capability provides holistic defense
- Cloud-based protection with flexible commercial models and access options provides cost efficiencies

## ABOUT LEVEL 3

We operate and take end-to-end responsibility for the network solutions that connect you to the world. We put customers first and take ownership of reliability and security across our broad portfolio.
