

# LEVEL 3<sup>SM</sup> DYNAMIC CAPACITY

**BUSINESS NEEDS CHANGE RAPIDLY, AND WITH LEVEL 3 DYNAMIC CAPACITY, ENTERPRISES CAN MEET FLUCTUATING NETWORK AND BANDWIDTH REQUIREMENTS ON DEMAND.**

**Intuitive tools for adjusting bandwidth on-demand or scheduling an event.**

## Dynamic Capacity

Enterprises have the flexibility to increase their network bandwidth automatically for pre-scheduled or unplanned events, without additional internal resources or downtime.

## Control

Enterprises control costs by deciding when, where and how much bandwidth is required.

## Flexibility

With alerts-driven Level 3 Dynamic Capacity, enterprises can trigger automatic bandwidth increases based on their specific network performance thresholds.

## Predictability

Administrators know exactly what costs will be incurred before a change is made.

## Time Savings

IT can immediately access additional bandwidth, with no downtime.

## Visibility

Comprehensive reports provide visibility into all current and scheduled transactions, and a detailed history of all completed transactions.

## Enterprises can meet network needs on demand

- High-bandwidth-demand applications and new software deployments.
- Variable cloud computing resource consumption.
- Data backup/replication/BCDR events.
- Seasonal traffic increases, limited-time projects, or campaigns.

Level 3 Dynamic Capacity is available on Internet, IP VPN and Managed Services as well as our Business Ethernet product portfolio.

## Through Level 3<sup>SM</sup> Adaptive Network Control Solutions

enterprises have the tools to increase visibility and on-demand control of their networks, while helping boost productivity and manage costs in their rapidly evolving IT environments.

Automate network changes to free up IT staff and increase productivity.

Use intelligent data to predict needs and proactively manage private and public networks.

Take immediate action to adapt network resources to changing demands.

## Level 3 Adaptive Network Control

including Level 3<sup>SM</sup> Enhanced Management and Level 3 Dynamic Capacity services, delivers automated, on-demand solutions to a business' network management. By integrating highly scalable solutions, IT departments can solve specific challenges and better manage the applications that run their business.
