

## LEVEL 3<sup>SM</sup> E-LINE SERVICE WITH ADAPTIVE NETWORK CONTROL

Level 3 Ethernet Service powers secure, high-performance network solutions that enable voice, video and data applications. Level 3<sup>SM</sup> E-Line Service with Adaptive Network Control offers point-to-point and point-to-multi-point private connectivity with scalable, dynamic bandwidth making it ideal for providing high-speed connections among corporate headquarters, data centers and other business locations around the world to migrate legacy networks and equipment to Ethernet, expand existing WANs and get new applications online faster.

### Business Solutions

Level 3<sup>SM</sup> E-Line Service offers a turnkey Ethernet solution with Site Readiness inside wiring and Advanced Technical Services solution design, implementation planning and activation support, making it fast and easy to deploy new Ethernet networks and locations.

With end-to-end availability, class of service, and latency guarantees customers can rely on Level 3<sup>SM</sup> E-Line service as the foundation for delivering applications like high-performance computing, data replication, storage and archival, business continuity, voice communications and video conferencing.

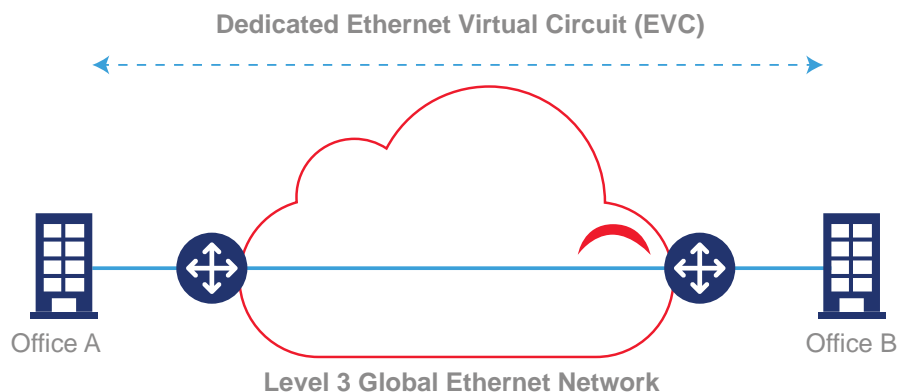

Level 3<sup>SM</sup> E-Line Service with Adaptive Network Control Solutions software defined networking (SDN) capabilities enable the network to respond to business needs in real-time, transforming how organizations design and manage their networks. Level 3 Ethernet service includes:

- Level 3<sup>SM</sup> Enhanced Management, which provides visibility into network performance characteristics on an end-to-end, site-by-site basis, so customers can better understand the demands on their network and how to streamline operations.
- Level 3<sup>SM</sup> Dynamic Capacity, which gives customers the ability to scale their bandwidth by up to 300% either on demand or automatically to accommodate traffic fluctuations from both planned and unplanned events.

Level 3<sup>SM</sup> E-Line Service runs over a secure, private MPLS backbone. Together with Level 3's portfolio of security services, Level 3<sup>SM</sup> E-Line Service provides a highly secure network solution on which to run your mission critical applications.

### E-Line Point-to-Point EPL

## Technical Features / Capabilities

- Layer 2 Ethernet over private MPLS
- Point-to-point and point to multi-point configurations
- Port Speeds: 100 Mbps, 1 Gbps, 10 Gbps
- Bandwidth Increments: 2 Mbps to 6 Gbps
- Class of Service: Basic, Enhanced, Dedicated
- Availability SLA: 99.999%
- Latency Guarantees Available
- MEF CE 2.0 Certified
- End to End Ethernet testing and monitoring - Dynamic Capacity and Enhanced Management
- Level 3<sup>SM</sup> Site Readiness inside wiring
- Level 3<sup>SM</sup> Advanced Technical Services

## Why Choose Level 3 E-Line Service?

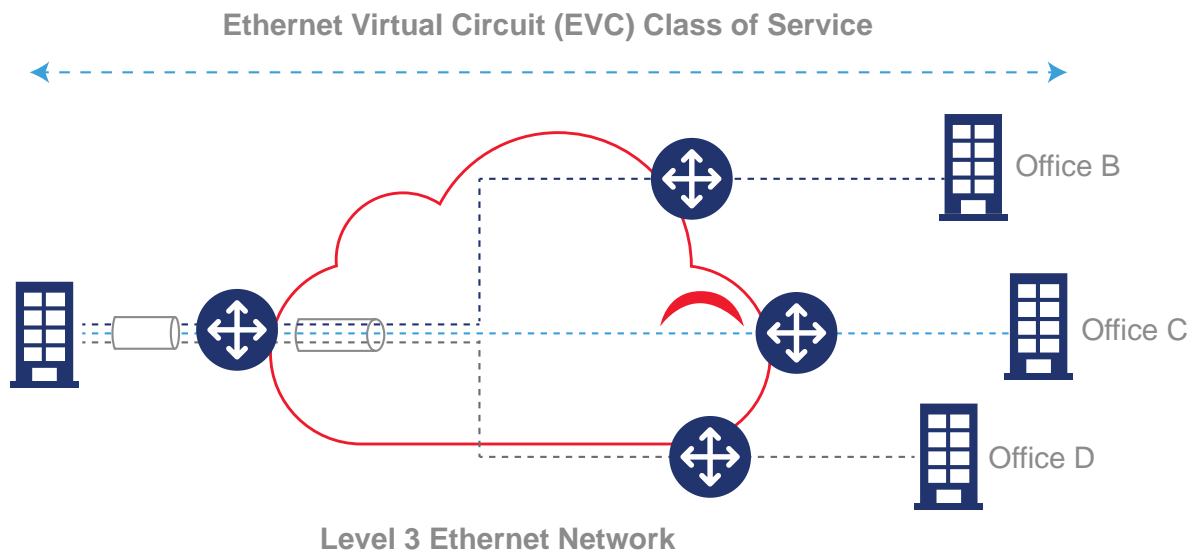

Available in 198 markets across North America, EMEA, Latin America and Asia Pacific\*

### MEF 2015 ETHERNET EXCELLENCE AWARDS:

- Retail Service Provider of the Year Global
- Retail Service Provider of the Year CALA
- Retail Service Provider of the Year North America
- Wholesale Service Provider of the Year North America
- Wholesale Service Provider of the Year CAL

\*Adaptive Network Control availability and other capabilities vary by location. Please check with your Account Representative for details.
