

LEVEL 3 CDN - MEDIA PORTAL

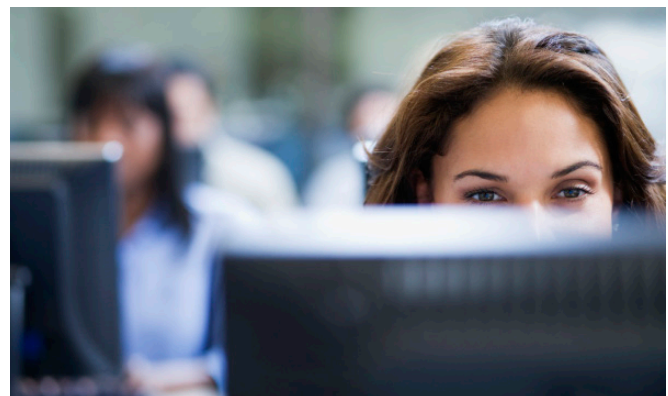

The Level 3SM Media Portal offers comprehensive monitoring, reporting, management, online help and self-service for your content delivery services – all in one centralized location. Detailed reporting and analytics are available via a customizable dashboard, so you can track the metrics most important to your business. Delegated access puts you in control of managing users and their privileges to the various Media Portal capabilities.

You can easily manage the configuration and provisioning of your content delivery services through portal and API-based self-service tools. The portal also provides full support of secure and private access to your network and billing data, along with capabilities to open trouble tickets for convenience and business efficiency.

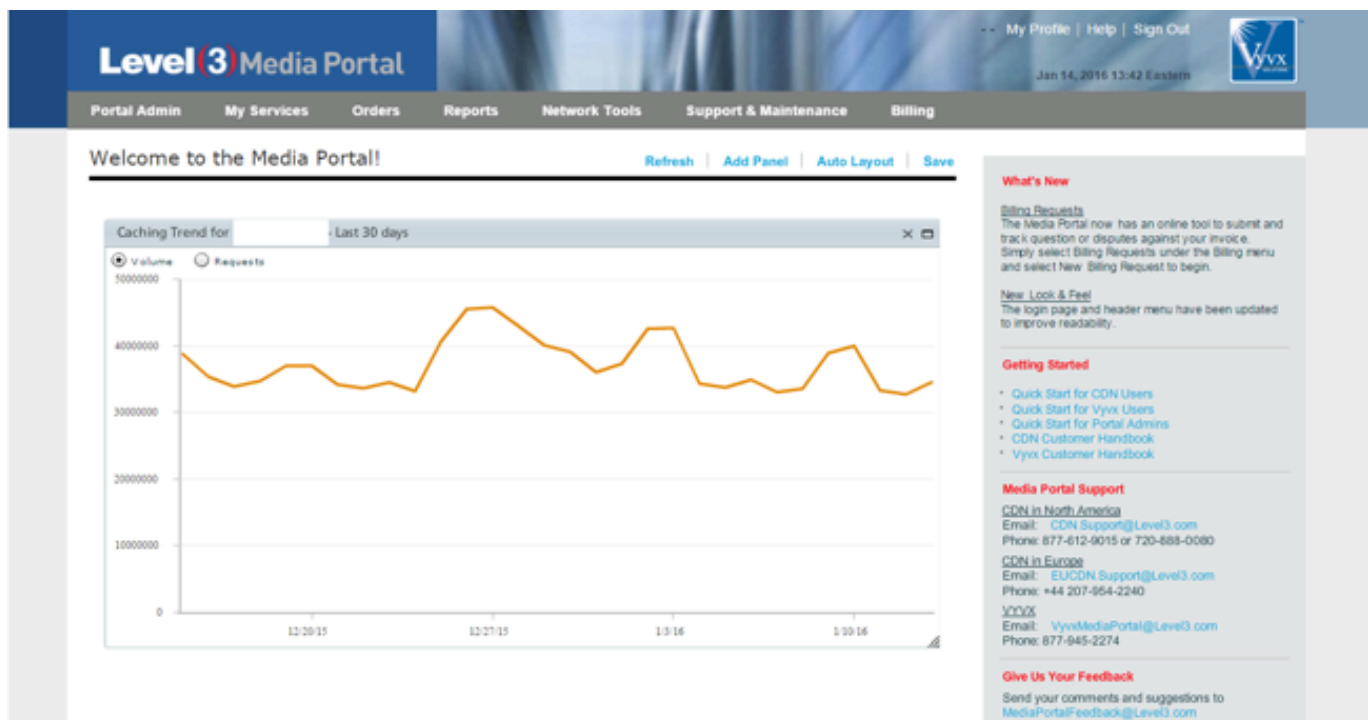

BENEFITS

Reporting: Get historical usage reporting and real-time traffic statistics for caching, streaming, and storage, as well as network performance data.

Managing CDN Services: Use the web interface or our API to manage the configuration of your CDN services by accessing configuration details, creating and deleting service properties, and modifying service attributes and parameters.

What's New

Billing Requests
The Media Portal now has an online tool to submit and track question or disputes against your invoice. Simply select Billing Requests under the Billing menu and select New Billing Request to begin.

New Look & Feel
The login page and header menu have been updated to improve readability.
