

LEVEL 3SM ORIGIN STORAGE PLATFORM

Level 3's Origin Storage Platform (OSP) service allows content libraries of virtually any size to be securely stored and easily managed over our global platform. Directly connected to Level 3's global IP backbone, the Origin Storage Platform is integrated with Level 3's Content Delivery Network (CDN), for easy, reliable delivery of stored files over the Internet.

BENEFITS

Speed: High speed egress to the Level 3 CDN via connectivity to the Level 3 IP network and an architecture design that allows lightning fast time-to-first-byte. Upload your content library rapidly with multiple methods to choose from and a high performance ingress platform.

High Availability: Geographic redundancy and a multi-region platform connected directly to the Level 3 IP network helps ensure your content is always available on our global CDN.

Protection: Level 3's OSP offers 100% content protection service level agreement (SLA) on your stored content. Additional layers of security include the Level 3 Security Operations Center (SOC) proactively monitoring and mitigating network level attacks 24 x 7.

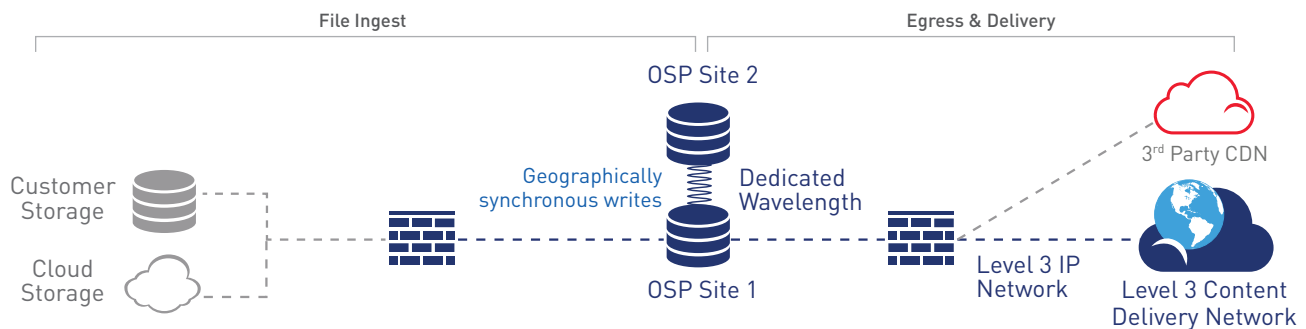

FEATURES

Content uploaded to a single (super-node) location is synchronously written to another storage node within the region.

Hardened high-availability and redundancy provided through content mirroring across a RAID 6 array of high density storage devices that are geographically diverse.

Multiple methods to upload data, including: FTP variants, SSH variants and Aspera.

ARCHITECTURE

ABOUT LEVEL 3

We operate and take end-to-end responsibility for network solutions that connect you to the world. We put customers first and take ownership of reliability and security across our broad portfolio.
