

LEVEL 3 DYNAMIC ENTERPRISE COMPUTING*

Business Solutions

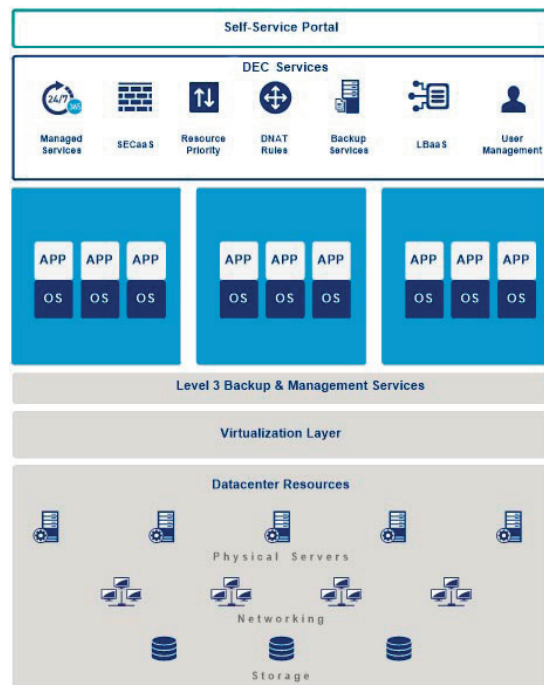

Business dynamics increasingly call for more resilience, efficiency and swiftness as information management becomes more complex. Processes to convert data into useful information become more integral and iterative. Data sources get multiplied and users diversified. This is why companies must have accessible, flexible and secure information and communications platforms.

Overview

Level 3's Dynamic Enterprise Computing cloud-based operating model enables network availability, security and computing management. It centralizes these services regardless of physical components, architectures or software required to support them to facilitate seamless incorporation.

It provides a portal interface that allows you to fully manage your environment in an autonomous, simple and intuitive manner. Level 3 Dynamic Enterprise Computing also offers consumption rates on an hourly basis.

You can also choose to rely on Level 3's experts to manage your operating systems, databases and standardized applications by incorporating Level 3 Managed Services. Additionally, you can contract the Internet Committed + Usage feature, which enables excess bandwidth consumption and pay the surplus for you use.

Level 3 Dynamic Enterprise Computing provides an accessible, flexible, secure, easy-to-integrate platform with a portal-based management interface.

* Only available in Latin America

Technical Features

Quality of Service: Select from various computing levels, which establishes the percentage reserve over the aggregate resource contracted.

Connectivity: Service owns three network zones: DMZ, Front End, and Back End.

Computing Resources Set's Components: vCPU, vRAM and vSTORAGE.

Consumer and Additional Elements:

- Operating Systems License
- Database Licenses
- VM Backups
- Load Balancer
- High availability for edge
- Public IPs Package
- Firewall and DNAT rules
- VM resources priority
- Snapshot

Supplementary Services:

- Internet Committed + Usage
- Level 3 Managed Network Services

Why choose Level 3's Dynamic Enterprise Computing

Management Portal: Dynamic and easily-operated portal provides access to a broad service catalog for autonomous administration of its resources.

Integral Service: Dynamic Enterprise Computing can be supplemented and integrated with other Level 3 Services to build a custom solution.

Pay for what you need: You may choose the quality of service best aligned to the use that you will make of the environment and pay for the resources as you bring them in, in local currency.

Quality of support: Highly trained and specialized staff manages online processes and procedures. Dedicated technical support 24/7.

Multi-Data Center Integration: Level 3 Data Center Network can enable services management throughout different countries.

Automated Processes: All processes are executed via automated workflows with minimal manual participation.

Availability: SLAs with 99.99% technical availability.

ABOUT LEVEL 3

We operate and take end-to-end responsibility for network solutions that connect you to the world. We put customers first and take ownership of reliability and security across our broad portfolio.
