

# LEVEL 3<sup>®</sup> SIP INTERNATIONAL LOCAL INBOUND

## A BUILDING BLOCK FOR A COMPREHENSIVE VOICE SOLUTION

A local connection is a critical asset for companies, whether doing business across the street or across the world. The Level 3<sup>®</sup> SIP International Local Inbound service provides local origination for U.S. national and international telephone numbers through a single IP point of interconnection. Using our network can help increase efficiencies and enhance applications to support your specific business needs. And our global footprint can provide support for a worldwide implementation with a localized feel. Level 3 provides a powerful Session Initiation Protocol (SIP) platform to deliver unique local services.

### Business Solutions

**Connections You Need:** Whether you require local service within the United States or internationally, Level 3 serves North and South America, Europe and Asia.

**Streamlined Networking:** Using Level 3 as your single supplier with local presence and national reach can simplify your supplier management and billing. Consolidate traffic from multiple points of origination to drive routing efficiencies and recognize cost savings.

**Synergistic Approach:** Level 3 uses an integrated approach to help ensure all systems and processes work together to support a seamless implementation to handle your specific needs.

**Designed for Business Growth:** Our high-performance, scalable solutions are designed to accommodate your current and future traffic needs and port your numbers seamlessly onto our network. We can provide the services you need today and aid in migration tomorrow.

**Security:** Leverage Level 3's Tier 1 national network and full-featured routing and control capabilities to improve your critical customer interactions. We protect your data with a holistic approach to security based on best practices. This is performed at every point within the network — from the edge to the core.

Level 3<sup>®</sup> Voice Services provide the best of proven, new technology (SIP) with legacy voice technologies, with access across the globe. We own and operate one of the largest, most secure voice networks to enable competitive cost structures and new, efficient ways of managing voice traffic.

**Our global footprint can provide support for a worldwide implementation with a localized feel.**

## Technical Features / Capabilities

- Local inbound service is available domestically in the U.S. as well as internationally in 26 countries serving North and South America, Europe and Asia.
- Inbound calling utilizes simultaneous sessions.
- Local number porting and national numbers dialing is available in select countries.
- Routing is available by Trunk Group or location and is customer-defined.
- Supported signaling includes SIP, H.323, and TDM.
- A wide array of CODECs are supported, including G.711, G.729, G.720ab, and, T-38.
- Choose your access methods: IP VPN, dedicated or public Internet.
- The Level 3 private backbone keeps traffic protected and isolated from the Internet for additional security.
- Billing Reports: Assist your organization's traffic, cost, and sales and marketing activity management.

## Why Choose Level 3?

**Growth through Connectivity:** Our international footprint supports local needs with a full suite of voice services and features, including local, long-distance, toll-free and SIP.

**Peace of Mind:** Implement a SIP solution or a combination and migrate your voice services at your own pace and without service interruption.

**Security:** High-quality, carrier-grade connections via private IP backbone network facilitates network security.

**Experience:** With over 12 years of experience designing and implementing voice solutions, we carry more than 13 billion minutes per month over more than 5 billion calls.

**Unyielding commitment to you and your business needs.**
