

LEVEL 3® SIP LONG DISTANCE

THE SMARTEST CALL YOU'LL EVER MAKE

Telecommunication services need to deliver mission-critical reliability to businesses — especially long distance services. Many of the largest companies trust Level 3 to provide these solutions. With a network designed for reliability, we provide the robust, feature-rich, global Level 3® SIP Long Distance service that delivers a cost-effective solution, enabling you to place outbound calls over a dedicated or switched connection between your locations. The end result is a crystal clear voice service delivered over our own high-performance digital communications network. Our services are available on a Session Initiation Protocol (SIP) platform designed for your unique needs.

Business Solutions

Support Business Growth: You can grow with our high-performance, scalable global network designed to accommodate your current and future traffic.

Control and Efficiency: Management features are designed to easily track and allocate costs to employees or projects. The Tier 1 network features redundancy throughout the infrastructure, for efficiency and performance you can trust.

Value and Quality: With our SIP Long Distance service, you receive competitive rates and can consolidate your toll-free traffic for a high-quality, integrated solution. It's ideal for your business, whether you need interstate, intrastate or international calling.

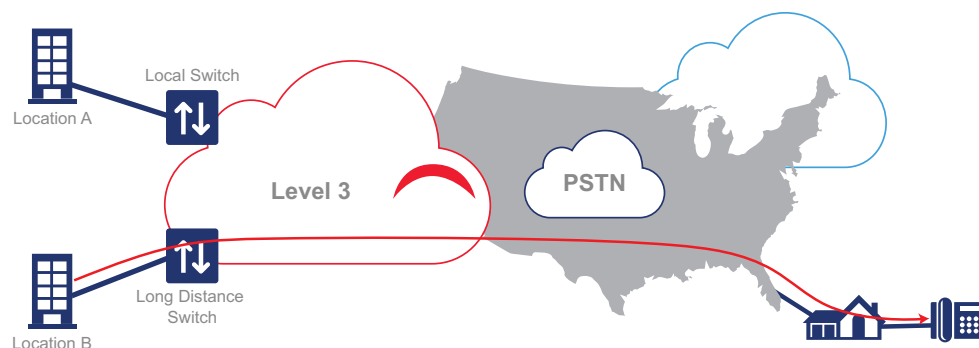

Simplified Supplier Management: Using Level 3 as a single supplier with local presence and global reach can simplify your supplier management and billing.

Security: We take a holistic approach to security based on best practices to protect your data. This is performed at every point within the network — from the edge to the core.

Elegant Technology Migrations: An integrated SIP network enables Level 3 to compete differently and allows enterprises to move from TDM to SIP on their own schedule.

Level 3® Voice Services provide the best of proven, new technology (SIP) with legacy voice technologies, with access across the globe. We own and operate one of the largest, most secure voice networks to enable competitive cost structures and new, efficient ways of managing voice traffic.

Technical Features / Capabilities

- Competitive rates for outbound long distance service from 30 countries in North America, South America, Europe and Asia with termination to more than 190 countries worldwide
- Domestic intrastate and interstate coverage to 85% of the U.S. population with IP service and support for long distance.
- Options for TDM or IP service, and support for dedicated or switched long distance
- Directory Assistance available
- Expense management and control to easily track and allocate costs, with simplified billing and streamlined invoicing
- 24 x 7 network monitoring through our Network Operations Center (NOC)

Why Choose Level 3 for Long Distance Service?

Security: Implement a SIP or a combined solution and migrate over your voice services securely, at your own pace, without service interruption.

Efficiency: Our owned and operated Tier-1 network serves the world's customers. We provide an efficient, cost-effective, long-distance solution for business customers.

Experience: For over 12 years, we have implemented voice solutions and today carry more than 13 billion minutes per month and more than 5 billion calls.

Growth: Our global platform is anchored by our fiber network to deliver local, domestic and international services for today's needs and tomorrow's growth.

Customer Experience: Get a differentiated customer experience with personalized attention and the convenience and control of our customer portal.

ABOUT LEVEL 3

We build, operate and take end-to-end responsibility for the network solutions that connect you to the world. We put customers first and take ownership of reliability and security across our broad portfolio.
