

Do you need Level 3 MANAGED NETWORK SERVICES?

Does your managed services provider (MSP) take **end-to-end responsibility for your network**?

Does your staff have the time and **expertise to keep pace with changing technologies**?

YES

NO

NO

YES

Good! You already gain the benefits and efficiencies of having a single source provider for managed routers, network and access.

Uh-oh... Be prepared for the "blame game" from multiple vendors when network issue resolutions take longer to coordinate/deploy. **Avoid the headaches. Let Level 3 be your single point of contact and streamline processes.**

You're not alone. Rapidly changing network technologies demand specialized expertise, equipment and resources that may fall outside of your IT team's wheelhouse.

Impressive! Your staff is able to do it all at your current size.

Does your MSP provide **24 x 7 proactive monitoring**?

Do you ever run into **resource constraints**?

NO

YES

YES

NO

Really? That's scary. It could be real trouble when your unmonitored network gets blindsided with an unexpected issue.

Call Level 3 ASAP. We offer:

- Turnkey management and maintenance
- Proactive alarms,
- Alerts with automatic ticket generation
- Email notification

Great. Rest easy knowing your network is constantly monitored to help maximize uptime and performance.

Don't panic. Level 3 Managed Network Services can make your life easier by:

- Helping improve operational and cost efficiencies
- Simplifying network management

Maybe not now... But as your needs evolve, be sure to check out Level 3's comprehensive portfolio of solutions that can enable you to grow at the pace that suits you.

Is your MSP global with **continuous monitoring for all sites**?

Can you support **future growth and global locations**?

YES

NO

NO

YES

Excellent! Level 3 must be your MSP. We appreciate your business.

That's unfortunate. Don't be limited by your choice of MSP. Level 3's solutions extend equipment, network management and expertise to your premises, so you can easily add, monitor and maintain sites globally.

Sounds like you could use a hand. Level 3 knows the ins and outs of delivering managed network services globally.

Wow! Congratulations on the extensive capabilities of your IT staff.
