The rates and regulations contained in this Tariff apply only to the services furnished by Company and do not apply, unless otherwise specified, to the lines, facilities, or services provided by a local exchange telephone company or other common carrier for use in accessing the services of Company.

The Customer is entitled to limit the use of Company's services by end users at the Customer's facilities, and may use other common carriers in addition to or in lieu of Company.

2.1.2 Customers and Users may use services and facilities provided under the tariffs of the Company to obtain access to services offered by other companies. The Company is responsible for the services and facilities provided under its tariffs, and for its unregulated services provided pursuant to contract, and it assumes no responsibility for any service (whether regulated or not) provided by any other entity that purchases access to the Company network in order to originate or terminate such entity's own services, or to communicate with such entity's own Customers.

2.1.3 The Company shall have no responsibility with respect to billings, charges or disputes related to services used by the Customer which are not included in the services herein including, without limitation, any local, regional or long distance services not offered by the Company. SECTION 11 - EXCHANGE ACCESS SERVICE (CONT'D)

11.5 Direct Inward Dial (DID) Service

11.5.1 DID service provides a Customer with a voice grade telephonic communications trunk channel to receive incoming voice or data calls to local telephone numbers assigned to the Customer. It transmits the dialed digits for all incoming calls, allowing the Customer's incoming calls to be routed as required by the Customer to the Customer's designated equipment. DID Trunk Capability is charged with a monthly recurring fee on a per port ordered basis. There is also a recurring monthly fee charged for each DID number provisioned. Charges for DID capability and DID number blocks may apply in addition to charges specified for private lines contained herein and other charges that may apply in order to deliver incoming calls to the Customer's designated equipment, depending upon Customer location and subject to the availability of facilities.

11.5.2 So the Company may efficiently manage its number resources, the Company, at its sole discretion reserves the right to limit the quantity of DID number blocks a Customer may obtain. Requests for 30 or more DID number blocks must be provided to the Company in writing no less than five (5) months prior to activation. In addition, the Company reserves the right to review vacant DID stations or stations not in use to determine their utilization. Should the Company determine, based on its own discretion, that there is inefficient number utilization, the Company may reassign the DID numbers. The Company also reserves the right to provision service based upon the availability of facilities and equipment necessary to support the Customer's specific service requirements; pursuant to Section 11.5.1 above, additional charges shall apply where the Company provides service to Customers requiring such additional facilities or equipment.

11.5.3 The Customer has no property right to the telephone number or any other call number destination associated with DID service furnished by the Company, and no right to the continuance of service through any particular end office. The Company reserves the right to change such numbers, or the end office designation associated with such number, or both, assigned to the Customer, where the Company deems it necessary to do so in the conduct of its business.

SECTION 11 - EXCHANGE ACCESS SERVICE (CONT'D)

11.5.4 Customer shall not route or transmit traffic originated through toll free (8XX) dialing, or traffic typically subject to reverse billing treatment by any means, including but not limited to mapping to any Carrier Identification Codes (CIC), mapping to or in conjunction with any Level 3 DID numbers that utilize the Level 3 network, or use any other routing method that may cause the originating telephone company to bill Level 3 for the origination of such traffic, without first obtaining explicit written permission from an officer of Level 3. Customers transmitting or routing such prohibited traffic shall be subject to immediate discontinuance of its service or service arrangements without advance notice, and Customer shall be liable for any charges billed to Level 3 due to such transmission or routing. In the event that Customer sends calls to Level 3 that are not approved for termination, then Customer shall pay Level 3 an additional \$.04 per minute for all of its toll free (8XX) or reverse billing originated traffic. Transmission or routing of toll free (8XX) or reverse billing type of traffic to any ports or DID numbers provided by Level 3 without complying with the foregoing requirements may result in the immediate termination of Service by Level 3, in its exclusive discretion, without prior written notice to Customer.

SECTION 11 - EXCHANGE ACCESS SERVICE (CONT'D)11.7 DID/DOD Service

- 11.7.1 DID/DOD Service combines DID Service as described in Section 10.3 with Direct Outward Dial (DOD) service. DOD service is not provided independently of DID service. DID/DOD Service provides a Customer with a voice grade telephonic communications trunk channel to place and receive voice or data calls. DID/DOD Service does not provide a line-side connection. It transmits the dialed digits for incoming or outgoing calls, allowing the Customer's calls to be routed as required by the Customer to the Customer's designated equipment. Charges for individual DID/DOD number blocks apply in addition to charges specified for private lines contained herein , and other charges may apply in order to deliver calls to the Customer's designated equipment, depending upon Customer location and subject to the availability of facilities. Other charges will apply for conversion to IP and IP transport/switching before delivery to customer as part of the Enhanced Service. ESP long distance services can be provided in conjunction with DID/DOD Service or Customers may choose to route traffic to other carriers for long distance termination. Connectivity to E911, operator services and directory assistance is supported.
- 11.7.2 So the Company may efficiently manage its numbering resources, the Company, at its sole discretion, reserves the right to limit the quantity of DID/DOD number blocks a Customer may obtain. Requests for 30 or more DID/DOD number blocks must be provided to the Company in writing no less than five (5) months prior to activation. In addition, the Company reserves the right to review vacant DID/DOD stations or stations not in use to determine their utilization. Should the Company determine, based on its own discretion, that there is inefficient number utilization, the Company may reassign the DID/DOD numbers. The Company also reserves the right to provision service based upon the availability of facilities and equipment necessary to support the Customer's specific service requirements; pursuant to Section 11.7.1 above, additional charges shall apply where the Company provides service to Customers requiring such additional facilities or equipment.
- 11.7.3 The Customer has no property right to the telephone number or any other call number destination associated with service furnished by the Company, and no right to the continuance of service through any particular end office. The Company reserves the right to change such numbers, or the end office designation associated with such number, or both, assigned to the Customer, where the Company deems it necessary to do so in the conduct of its business.

14.1.2 Other services may be provided by the Company on an Individual Case Basis (ICB).

14.2 Type I and Type II Services

14.2.1 DS3 Service and DS1 Service may be provided as either Type I or Type II Services, depending upon the availability of facilities. Type I Service rates apply when both endpoints of the channel are served by the Company's network. 14.3 DS3 Services (44.736 Mbps)

14.3.1 DS3 Service is composed of digital channels provided at 44.736 Mbps for the transmission of one-way and two-way communications. Interconnections to such channels and equipment interfacing to such channels shall meet the following technical characteristics:

Line Rate: 44.736 Mbps +/- 20 ppm

Line Code: Bipolar with three-zero substitution

Test Load: 75 ohms resistive +/- 5 percent

SECTION 14 - DEDICATED ACCESS SERVICES (CONT'D)

14.3 DS3 Services (44.736 Mbps) (cont'd)

Power Levels: For an all-ones signal, the power in a 2 KHz band above 22.368 KHz shall be -1.8 to +5.7 dBm and the power in a 2 KHz band above 44.736 MHz shall be at least 20 dB below that in a 2 KHz band above 22.368 KHz. ¹

NOTES:

^{1.} The power levels specified by CCITT Recommendation G.703 are identical except that the power is to be measured in 3 KHz bands.

14.3.2 Digital channels at 44.736 Mbps will be provided in one of the following configurations, as specified by the Customer:

14.3.3 Clear Channel DS3: A DS3 signal that is transmitted intact and transparently as provided at the Customer interface. No performance monitoring is performed since all 44.736 Mbps are considered Customer data or voice.

14.3.4 M13 Framed DS3: A DS3 that is channelized into 28 DS1 (1.544 Mbps) signals and include a predefined standard multiplexing scheme as defined in ANSI T1.107a. The M13 DS3 contains parity bits which can be monitored to offer an approximate measure of performance. 43.232 Mbps is Customer data (or voice), the remainder being used for framing, synchronization, parity, etc.

14.3.5 C-bit Parity Framed DS3: A DS3 that can be used for subrated or nonsubrated DS3 signals. This allows DS3 signal monitoring for end-to-end performance measurement on an in-service basis, transmitted on the maintenance data communications channel. The C-bit parity format is defined in ANSI T1.107a. 43.232 Mbps is Customer data (or voice), the remainder being used for framing, synchronization, parity, etc.

14.4 DS1 Service (1.544 Mbps)

(T)

14.2.1 DS1 Service is composed of digital channels provided at 1.544 Mbps for the transmission of one-way and two-way communications. Interconnections to such channels and equipment interfacing to such channels shall meet the following technical characteristics:

Line Rate: 1.544 Mbps +/- 120 ppm (T)

Line Code: Bipolar with either AMI (Alternate Mark Inversion) (T)
or

B8ZS (Binary 8-zero substitution) (T)

14.4 DS1 Service (1.544 Mbps) (cont'd)

Test Load: 100 ohms resistive +/- 5 percent (T)

Pulse Shape: The pulse amplitude shall be between 2.4 and 3.6 volts.

Power Levels: For an all-ones signal, the power in a 3kHz +/-1 kHz band centered at 772 kHz shall be between 12.6 dBm and 17.9 dBm. The power in a 3 kHz +/-1 kHz band centered at 1544 kHz shall be at least 29 dB below that at 772 kHz. (T)
(T)

Pulse

Imbalance: There shall be less than 0.5 dB difference between the total power of the positive pulses and the negative pulses.

NOTES:

1. The CCITT specification is ± 50 ppm.
2. Recommended for new equipment: The power in a 2 KHz band about 772 KHz shall be 12.6-17.9 dBm. CCITT requirements: The power in a 3 KHz band about 772 KHz is 12.0-19.0 dBm.
3. CCITT requirements: The power in a 3 KHz band about 1544 KHz shall be at least 25 dB below that in a 3 KHz band about 772 KHz.

14.4.2 Digital channels at 1.544 Mbps will be provided in one of the following configurations, as specified by the Customer:

14.4.3 Clear Channel DS1: A DS1 signal that is transmitted intact and transparently as provided at the customer interface. No performance monitoring is performed since all 1.544 Mbps are considered customer data or voice. (C)

14.11 Rates for Dedicated Access Services

(T)

14.11.1 General

(T)

Nonrecurring and monthly recurring rates apply for each Digital Transmission Service furnished by the Company. Monthly recurring rates vary according to the time period for which the Customer commits to take the service. Unless otherwise noted, these standard rate elements are used in calculating the monthly recurring rate for each service:

14.11.1.1 Interoffice Channel Mileage-Fixed: This rate element applies per digital channel whenever there is mileage associated with the channel; a digital channel has mileage associated with it when the endpoints of the channel are located in geographic areas normally served out of separate Customer premises or the Customer premise and the Level 3 Gateway. This rate element applies per circuit endpoint.

(T)

14.11.1.2 Interoffice Channel Mileage-Per Mile: This rate element applies whenever there is mileage associated with the digital channel. The unit rate is multiplied by the number of miles (Interoffice Mileage) between the two Customer premises or the Customer premise and the Level 3 Gateway. Fractions of a mile are rounded up to the next whole mile before rates are applied.

b. 5 Year Long Term Lease

A standard long term lease has a term of 5 years. Multiple long term leases may be purchased for any Dedicated Access/Private Line service ordered by purchasing a purchase option. The purchase option is a one-time NRC that is applied at year one. The cost of the purchase option to Customer will be 1% of the Future Value of the option at the beginning of the first 5-year term. For example; Customer may purchase 2 x Long Term Lease OC3c which would mean that Company agrees to provide a defined OC3c circuit to customer for an initial five year term and a second five year term at the option of Customer. At the end of the first 5-year term, Customer may exercise the option at the predetermined price set at the contract/option signing (year 0).

Long Term Lease is available for DS1 and DS3 level services on an Individual Case Basis (ICB).

Long Term Lease charges will consist of a non-recurring lease charge, segment(s) and termination(s) charges, a non-recurring lease install charge, and an annual Operation and Maintenance (O&M) charge.

The Long Term Lease option also has an annual O&M fee (paid annually in advance) of 2.5% of the Long Term Lease fee. It will be incremented annually by the CPI.
